EV Sales Analysis Report

Introduction

This project analyzes Electric Vehicle (EV) sales data in India from 2014 to 2024. The objective is to understand growth trends, regional performance, and vehicle category contributions to identify key insights for the EV market.

Dataset Information

- Total Records: ~96,000+
- Time Period: 2014 – 2024
- Features:
    - Year
    - State
    - Vehicle Category
    - Vehicle Type
    - EV Sales Quantity

Analysis & Findings

Year-wise EV Sales Trend

- 2014 → 2,392 sales
- 2018 → 130,254 sales
- 2021 → 331,498 sales
- 2022 → 1,024,723 sales
- 2023 → 1,525,179 (peak)

Insight:
EV market showed **explosive growth** after 2021
→ This can happen due to government policies & awareness

State-wise EV Sales (Top Performers)

Top states:

- Uttar Pradesh → 732,074
- Maharashtra → 401,535
- Karnataka → 315,498
- Delhi → 268,538
- Rajasthan → 228,573

Insight:

- Large population states dominate EV adoption
- Urban + policy-driven states (Delhi, Karnataka) bhi strong hain

Vehicle Category Analysis

- 2-Wheelers → 1.8 Million+
- 3-Wheelers → 1.6 Million+
- 4-Wheelers → 149K
- Others/Bus → very low

Insight :
EV adoption's main driver **2-wheelers & 3-wheelers** are in India.
Cars (4-wheelers) adoption is slow currently.

Key Insights

- **Rapid growth** in EV sales **(especially after 2021)**
- Uttar Pradesh is the biggest EV market
- 2W & 3W segment dominates (mass adoption)
- 4W EVs are in lower stage currently
- Market strongly growing but uneven across states

Business Recommendations

- Focus on **2W & 3W EV market** (highest demand)
- Target Tier-2 & Tier-3 cities (UP, Bihar, Rajasthan)
- Improve Charging infrastructure
- Launch Affordable EV models
- Use Government incentives for expenses

Conclusion

The EV market in India is growing rapidly, especially after 2021. The adoption is primarily driven by 2-wheelers and 3-wheelers, while 4-wheelers still have growth potential. Strategic focus on affordability, infrastructure, and regional expansion can accelerate EV adoption further
